

Key Data	
Oil	17,500 BPD
Flow Stations	16
Well Fields	270

Project: Mene Grande Field
Operations & Maintenance

Began: 2001

Location:
Mene Grande, Zulia state, Venezuela

Scope:
Production Operations &
Maintenance Full field Operations
and Management

Accomplishments:
Increased Field Productivity from
24% to 89%
Reduced Spare Parts consumption
by 43%
Equipment Availability: 97.8%
No lost time incidents recorded in
over 250,000 man hours

GreyStar's management and field organization assigned at Mene Grande have worked closely with Repsol's management to turn the oldest producing field in Venezuela into a successful venture.

Efficiency and production levels have improved dramatically since GreyStar became Repsol's primary Operations and Management contractor.

In 2006 a joint venture between PDVSA and Repsol, called Petroquiriquire and retained the services of OGS.
