

Project: Atlantis Operations Support Personnel

Began: 2003

Locations:

Green Canyon Block, Gulf of Mexico

- 787
- 743

Scope:

GreyStar is providing personnel for the operation and maintenance of the Atlantis Deepwater production facilities.

The classification of personnel being provided to the project include:

- Production Operators
- Subsea Operators
- Laboratory Technicians
- Gas Turbine Technicians
- High Voltage Electrical Technicians
- Measurement Technicians
- Clerks/Helicopter Landing Officers
- Planner/Schedulers
- Roustabouts/Deck Crews

During the construction and “Operational Readiness” phases, GreyStar provided key specialist personnel for field inspection, pre-commissioning and commissioning responsibilities.

Key Data	
Water Depth	4,400-7,100 Ft.
Oil	150,000 BPD
Gas	180 MMSCFD

Equipment:

Equipment consists of electrical generating equipment and oil and gas processing equipment.

The Atlantis topsides consist of three modules. The production and compression modules each weighing about 5,000 tons; and a power generation module weighing 4,000 tons.
