

**Project:** Boscan Field Operations & Maintenance

**Began:** 2004

**Location:**

Boscan Field, Zulia state, Venezuela

**Scope:**

Operate and maintain oil field and process facility

**Accomplishments:**

The Boscan Field Operations and Management is one of the most significant oil field operations in Venezuela.

GreyStar was originally awarded the operations management contract by Chevron when it was determined that GreyStar is the “best qualified and most reliable contractor in Venezuela.”

The field operations include not only a large oil producing field, but also a processing plant and extensive electrical distribution system.
