

**Project:** NaKika Operational Readiness

**Began:** 1999

**Location:**

Mississippi Canyon Blocks, Gulf of Mexico

- 474
- 429
- 657
- 607
- 522
- 520
- 383

**Scope:**

- Operational Readiness
- Operations & Maintenance Personnel assigned as integral part of the project design team
- Access to our experience in high-volume and complex facilities design, maintenance and operation.
- Implementation of the Computerized Maintenance Management System

Key Data	
Water Depth	7,000 Feet
Oil	110 MBPD
Gas	500 MMSCFD

### **NaKika New Technology**

- First semi-submersible host for Shell in deep water
- Central host for development of five dispersed sub sea fields (six including Coulomb)
- Deepest water depth for development wells in the world
- First deepwater sub sea well completion with three commingled reservoirs
